

Mrs. Wells' First Graders at W.F. Killip Elementary
in Flagstaff, Arizona

Our Hypothesis:

Nine students think we will find the same animals
in our pond water as students around the world.

Fourteen students think we will find

Our pond water sample came from:

A local pond known as "The Duck Pond"

Here is a tally chart showing the organisms we
found and how many of each we found:

Organisms	Number Found
Water Fleas	33
Seed Shrimp	11
Worms	5
Dragonfly Nymphs	3
Damselfly Nymphs	5
Scuds	4

We also found algae and small leaves and other plant parts.
