

Julio Alvarado School  
Ponce, Puerto Rico  
5-4

Hello!

We made our first observations in the morning. It was about 9:00 and 85 degrees out. Our class worked in groups of three. We created eight squares in our yard area to observe for our Squares of Life. Here are our findings:

We enjoyed observing our square of life. We saw insects, lizards,snails, worms, birds and miriapodes. We found seeds, rocks, dirty, candy wrapper. We also saw brown leaves on the ground. We had fun working in Square of Life project.

Here are some pictures of we found in our squares:
