

Sutton school is near the city of Canberra but has lots of farms around as well as some Australian bush behind us. We are hot and dry in Summer and can even get snow in winter.

The school we compared our square to was Saratoga. Saratoga is like Sutton. Saratoga is in New York.

We think our squares are different because Saratoga's square had a snake skin and one of our squares had a bone which was small. One of our squares had 2 big patches of grass and they were very big. There were also two ant nests, but one of them was hiding in a patch of grass so we could hardly see it. The other ant nest wasn't hiding in a patch of grass.
